

Below is a list of television channels that people commonly watch. Not all channels are available on all streaming services.

To use this chart, first find the channel you are interested in from the left column.

Reading across the chart will tell you which streaming services carries your channel.

If you plan on subscribing (paying) for a streaming service first make sure the service carries what you want. Generally, the more you pay the more channels you get.

Yes = The channel is available on the cheapest pricing tier. That price is listed next to the service's name.

No = The channel isn't available at all on that service.

\$ = The channel is available for an extra fee, either a la carte or as part of a more expensive package or add-on.
